RosenbergerHSD® - High Speed Data Syst

RosenbergerHSD® Connectors and Cable Assem

The new **RosenbergerHSD® interconnect system**, based on a symmetrical, impedance controlled 100 Ohm interconnect transmission in premium quality. The high performance digital shielding concept with complete braid connection to the outer

The RosenbergerHSD® interconnect system has been developed for applications such as LVDS cameras, USB connections or IEEE 1394 applications. The RosenbergerHSD® system can also be applied for digital infotainment systems, symmetrical networks or even radio base stations.

Products and features

- PCB connectors
- 4-pole cable assemblies
- Coding system
- Excellent electromagnetic shielding
- Applications up to 1.6 Gbit/sec.: 2 differential pairs – 8
