

## Trade Press Release

### **ATC Is Listed Supplier for Military High Frequency 0402, 0603, 0805 NPO MLCs**

February 2, 2005, Huntington Station, N.Y.----- American Technical Ceramics Corp is pleased to announce that they are now a listed supplier to DSCC Military Drawings 05003, 05002 and 05001, encompassing BP (NPO) characteristic high frequency multilayer ceramic chip capacitors in industry standard case sizes 0402, 0603 and 0805 respectively.

These ATC DSCC-listed capacitors are supplied with Group A testing per MIL-PRF-55681 as a minimum. Additional Group C testing alternatives are also available as an option, referenced in the applicable DSCC drawings. Links to the military drawings as well as part number code and testing information are provided on ATC's Website at:  
[www.atceramics.com/products/military\\_eia\\_products.asp](http://www.atceramics.com/products/military_eia_products.asp)

The new military drawings, which give the customer an additional option for procurement, have been generated by DSCC in response to the increasing demand for approved high frequency MLC capacitors in industry-standard case sizes.

ATC's EIA 600 Series Ultra-low ESR Capacitors are also available as COTS up-screened products for space-level applications. To order these products the customer can specify the appropriate COTS up-screen prefix in front of the ATC part number. Please refer to ATC Document # 001-906 for a full description of ATC's COTS Program.
